

# Acknowledgment of Reviewers

Four hundred thirty-seven individuals, in addition to members of the PLANT DISEASE Board, served as reviewers of manuscripts during a recent 12-month period. Appreciation for their help to authors and the journal is expressed to the following:

G. S. Abawi	T. A. Chen	C. A. Griffey	T. Katan
T. S. Abney	B. J. Christ	H. M. Griffiths	C. M. Kearney
G. C. Adams, Jr.	E. L. Civerolo	M. P. Grisham	B. L. Keeling
J. E. Adaskaveg	H. Cole, Jr.	D. E. Groth	N. J. Keller
H. S. Aldwinckle	W. S. Conway	J. V. Groth	W. D. Kelley
S. J. Allen	D. A. Cooksey	G. G. Grove	C. M. Kenerley
T. C. Allen	H. M. Couey	W. D. Gubler	K.-C. Kim
W. R. Allen	D. L. Coyier	R. T. Gudauskas	B. C. Kirkpatrick

## Salute to APS Sustaining Associates

This section is designed to help APS members understand more about APS Sustaining Associates. Information is supplied by company representatives. Each month features different companies. A complete listing appears in each issue of *Phytopathology*.

**Illinois Foundation Seeds, Inc. Contact: Arden Howey, P.O. Box 722, Champaign, IL 61824; 217/485-6420.** Illinois Foundation Seeds, Inc., markets a diverse array of seedstocks throughout the world. Development and testing of proprietary yellow and white corn inbreds and soybean cultivars involves 50 trained personnel located across the U.S. corn belt. In addition, a highly qualified staff ensures production of top-quality foundation seedstocks for distribution to the seed trade.

**ISK Biotech Corporation. Contact: Myron Bliss, 5966 Heisley Road, Mentor, OH 44061-8000; 216/357-4145.** Fermenta ASC Corporation, with headquarters in Mentor, Ohio, serves four world business areas: North America, Latin America, Europe/Middle East/Africa, and Asia/Pacific. The Asia/Pacific area includes Australia, New Zealand, and the People's Republic of China. Fermenta brings to the world of agricultural chemicals advanced product development, state-of-the-art manufacturing facilities, and sophisticated marketing techniques to serve a growing global market. These basic capabilities have resulted in a line of superior weed and disease control products such as Bravo and Daconil 2787 fungicides that significantly improve the health of turfgrass and ornamental plantings and increase the quality and yields of such crops as peanuts, bananas, wheat, stone fruit, and vegetables. Bravo and Daconil 2787 are supported by a complete toxicology database and extensive residue studies that demonstrate low dietary and worker exposure. The product meets the negligible risk standard proposed by the National Academy of Sciences. Fermenta is uniquely positioned to respond to promising new opportunities.

**Istituto di Fitoviologia Applicata del CNR. Contact: M. A. Conti, Strada Delle Cacce, 73, Torino 10135, Italy; (011) 3977.1, fax: (011) 343809.** The institute, founded in 1968 by the Italian National Research Council (CNR), has grown to become the largest group of plant virologists in Italy. Its main work is on viruses, viroids, and mycoplasmas. The principal techniques used are serology, electron microscopy, bio-

chemistry, and molecular biology, and the main lines of work are virus characterization, diagnostics, epidemiology, physiopathology, and quarantine studies. The institute cooperates with CIAT, CIMMYT, and other national and international institutions.

**Janssen Pharmaceutica. Contact: David B. Helmer, Plant Protection Division, 40 Kingsbridge Road, Piscataway, NJ 08855-3998; 908/524-9012.** With headquarters in Beerse, Belgium, Janssen Pharmaceutica has developed antifungal compounds for human and veterinary pharmaceutical use and for agricultural and industrial applications. Imazalil has been developed for application to wheat and barley as a seed treatment and for postharvest treatment of citrus fruit. Specific formulations are available through licensed distributors. New uses of imazalil, which are under development, focus on seed treatment of field and vegetable crops. Postharvest uses are being expanded to include vegetables and other fruits.

**Landis International, Inc. Contact: W. R. Landis, President, P.O. Box 5126, Valdosta, GA 31603-5126; 912/247-6472.** Landis International, Inc., is a world leader in research and development management, specializing in agricultural products. It has the capability of guiding products through their entire research and development (R&D) process in the most expedient and cost-effective manner. Landis has extensive expertise with the regulations and requirements of the U.S. Environmental Protection Agency (EPA). Its state regulatory expertise with the EPA and individual states is broad-based. Landis stays abreast of and conducts all federal and state requirements under Good Laboratory Practices guidelines. Areas of management expertise include formulation development and evaluation, toxicology, residue chemistry, environmental safety, nontarget organism studies, and worker exposure. The company has successfully negotiated protocols with the EPA, including soil dissipation, dislodgeable residue, import tolerances, and worker exposure studies. Landis is experienced in bio-rationals and formulation inerts, as well as classical pesticide areas. The company has successfully brought these products through to registration and clearance with the EPA. Landis takes a project management approach to R&D management and includes staff in the disciplines of plant pathology, entomology, agronomy, nematology, and chemistry who bring technical expertise to each project. Landis has opened offices in Europe to provide similar services to the European Economic Community.
